<b>Description</b>			
steps:			
1. make an entry using 3 different accounts			
2. mark an account as inactive			
3. visit the entry's edit page			
result:			
account field for item with deleted account is empty.			
potential fix:			
In the entries.forms module's <code>_allow_only_active_accounts</code> function, we could check to see if the entry has an initial account. If so, then don't change the queryset for that form.
